

Name of Student: Vyankatesh Suresh Rohokale	PRN: 26070122518
Semester: III	Year : AY 2026-27
Subject: Programming with Java	
ASSIGNMENT No : 9	
TITLE : Final Keyword in Java	

Problem Statement

Write a Java program to demonstrate the use of the final keyword with variables, methods, and classes.

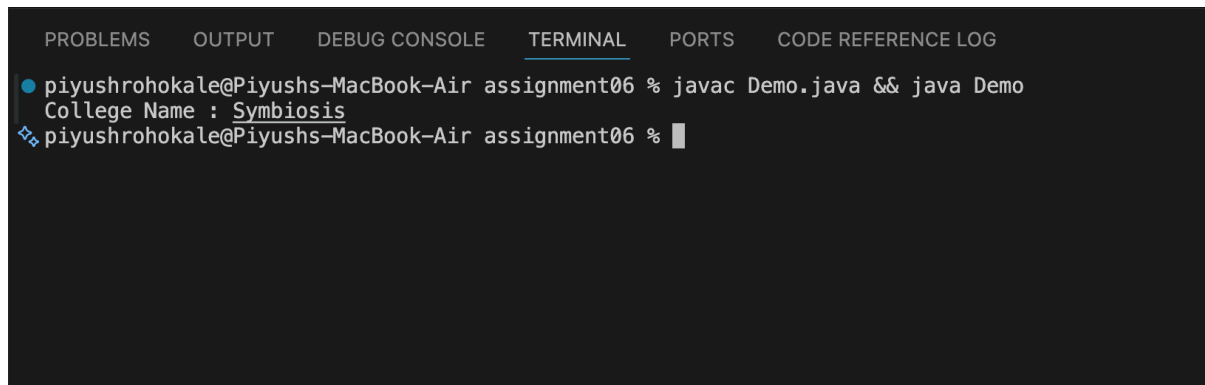

Learning Objectives

To implement the final keyword with variables, methods, and classes.

Programme

```
J Demo.java X
J Demo.java
1  final class College {
2
3      // Final variable
4      final String collegeName = "Symbiosis";
5
6
7      // Final method
8      final void displayCollege() {
9          System.out.println("College Name : " + collegeName);
10     }
11 }
12
13 public class Demo {
14
15     public static void main(String[] args) {
16
17         College c = new College();
18
19         c.displayCollege();
20     }
21 }
```

Output

```
PROBLEMS  OUTPUT  DEBUG CONSOLE  TERMINAL  PORTS  CODE REFERENCE LOG
piyushrohokale@Piyushs-MacBook-Air assignment06 % javac Demo.java && java Demo
College Name : Symbiosis
piyushrohokale@Piyushs-MacBook-Air assignment06 %
```

Conclusion

The program successfully demonstrates the use of the final keyword in Java with variables , methods, and classes. A final variable ensures that its value cannot be changed , a final method prevents method overriding, and a final class cannot be inherited. Using the final keyword helps improve the security , reliability , and stability of Java programs by preventing unwanted modifications.
