

Name of Student: Vyankatesh Suresh Rohokale	PRN: 26070122518
Semester: III	Year : AY 2026-27
Subject: Programming with Java	
ASSIGNMENT No : 13	
TITLE : File Handling in Java	

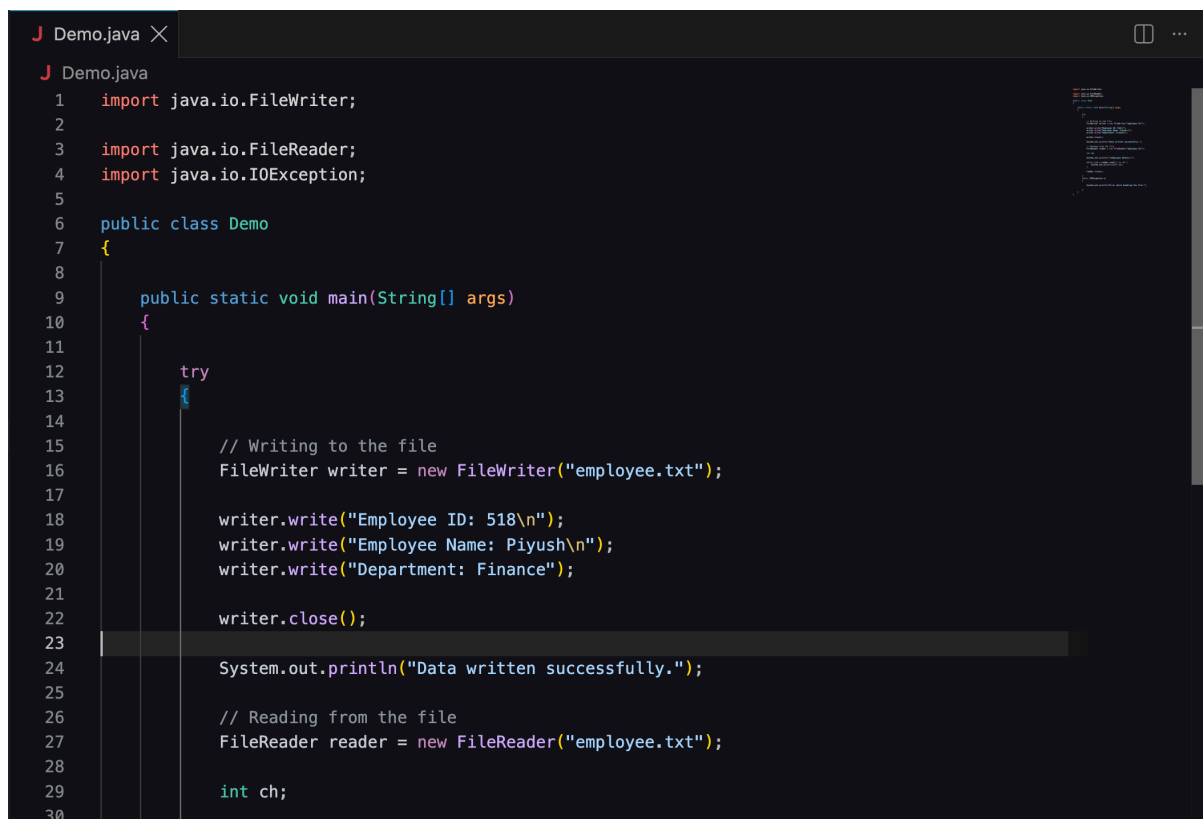

Problem Statement

Write a Java program to perform reading from and writing to a file using file handling operations.

Learning Objectives

To perform file reading and writing operations using Java file handling classes.

Programme

A screenshot of a Java IDE with a dark theme. The editor shows a file named 'Demo.java' with the following code:

```
1  import java.io.FileWriter;
2
3  import java.io.FileReader;
4  import java.io.IOException;
5
6  public class Demo
7  {
8
9      public static void main(String[] args)
10     {
11
12         try
13         {
14
15             // Writing to the file
16             FileWriter writer = new FileWriter("employee.txt");
17
18             writer.write("Employee ID: 518\n");
19             writer.write("Employee Name: Piyush\n");
20             writer.write("Department: Finance");
21
22             writer.close();
23
24             System.out.println("Data written successfully.");
25
26             // Reading from the file
27             FileReader reader = new FileReader("employee.txt");
28
29             int ch;
30
```

```

30
31     System.out.println("\nEmployee Details:");
32
33     while ((ch = reader.read()) != -1) {
34         System.out.print((char) ch);
35     }
36
37     reader.close();
38
39 }
40 catch (IOException e)
41 {
42
43     System.out.println("Error while handling the file.");
44
45 }
46
47 }

```

Output

```

piyushrohokale@Piyushs-MacBook-Air assignment06 % javac Demo.java && java Demo
Data written successfully.

Employee Details:
Employee ID: 518
Employee Name: Piyush
Department: Finance%
❖ piyushrohokale@Piyushs-MacBook-Air assignment06 % █

```

Conclusion

The program successfully demonstrates file handling in Java by writing data to a file and reading it back using `FileWriter` and `FileReader`. It also uses exception handling to manage file-related errors safely. File handling is an important feature in Java that allows data to be stored permanently and retrieved whenever required, making it useful for many real-world applications.
